

NURSING PROGRAM MEETING
The WorkSource

October 7, 2004

REFLECTIONS:

What worked?

- The process, time limits, time process checks
- Location
- Group breakout session
- Large group share
- Focused time and discussions by each of the sub-groups
- Small group with good ideas
- Brainstorming
- Small group work
- Handouts to facilitate discussion
- Sub-committee reports
- Well organized meeting; kept on task by Gracy; well defined process
- Sticking to schedule
- Sharing between groups
- Reporting the collaborative work

What didn't work?

- Too many members too set in the "right" way or "only" way to do things
- Some members not observing air time norm in small group work
- Marketing Sub-Committee too small; need hospital representation and someone with marketing expertise.
- Need to publish goals and strategies of the nursing project
- Late start
- Meeting too long

Recommendations for future meetings:

- Each sub-group needs a facilitator during the small group work
- Include HISD teachers for Professional Development sub-group.
- Recruit more members to participate in the Marketing/Internship/Externship sub-committee.
- Keep the group work and brainstorming sessions.
- Name cards for all
- Continue group reports and eventually connect it all together.
- Have some of the meetings at Jordan High School
